Cardiovascular Nursing
The most common
reason for being admitted to a CCU is an
acute heart attack or another form of acute
coronary syndrome. People with these
conditions often require ongoing therapy
that may need to be adjusted frequently, and
they are prone to rapid, unexpected changes
in their condition.

15 Ccu Simulations In Cardiovascular Nursing [EPUB]

A cardiac care unit (CCU) is a specialized hospital ward designed to treat people with serious or acute heart problems. People who undergo heart surgery also are placed in the CCU as they recover. These wards are equipped to provide specialized treatment for heart conditions and are staffed with medical personnel trained in cardiac care.

Patient-specific cardiovascular simulation has become a paradigm in cardiovascular research and is emerging as a powerful tool in basic, translational and clinical research. In this paper we discuss the recent development of a fully open-source SimVascular software package, which provides a complete pipeline from medical image data segmentation to patient-specific blood flow simulation and ...
