

Abstract Algebra Exam Solutions

When people should go to the book stores, search establishment by shop, shelf by shelf, it is in reality problematic. This is why we allow the books compilations in this website. It will categorically ease you to look guide **abstract algebra exam solutions** as you such as.

By searching the title, publisher, or authors of guide you essentially want, you can discover them rapidly. In the house, workplace, or perhaps in your method can be all best area within net connections. If you target to download and install the abstract algebra exam solutions, it is completely easy then, since currently we extend the colleague to buy and create bargains to download and install abstract algebra exam solutions correspondingly simple!

MATH 251: ABSTRACT ALGEBRA I FINAL EXAM SOLUTIONS Problem 1. For (a), we have simply 151. For (b), the elements of order 7 are $(x^{105}=7)^k = x^k$ with $k = 1, \dots, 6$, so $x^{15}; x^{30}; \dots; x^{90}$. For (c), no they are not isomorphic: $(Z=16Z)$ has at least 3 elements of order 2, namely, the classes of 1; 7, and $Z=8Z$ as a cyclic group has only one, the class of 4.

MATH 251: ABSTRACT ALGEBRA I FINAL EXAM SOLUTIONS

ABSTRACT ALGEBRA 2 SOLUTIONS TO THE PRACTICE EXAM AND HOMEWORK 1. Practice exam problems Problem A. Find $32C$ such that $Q(i; p^2) = Q(\dots)$. Solution to A. Either one can use the proof of the primitive element theorem, or, or one can just do this by hand. A little experimenting leads to the guess $= i^3 p^2$. This clearly lies in the field $Q(i; \sqrt[3]{p^2})$.

ABSTRACT ALGEBRA 2 SOLUTIONS TO THE PRACTICE EXAM AND HOMEWORK

Solution. The assertion is obvious if $n = 0$ so we will assume that $(ab)^n = a^n b^n$ for some $n \geq 0$, and demonstrate the veracity of the statement $(ab)^{n+1} = a^{n+1} b^{n+1}$. Now $(ab)^{n+1} = (ab)^n (ab) = a^n b^n a b$ by the induction hypothesis, and because G is Abelian, $a^n b^n a b = a^n a b^n b = a^{n+1} b^{n+1}$. Thus by induction, $(ab)^n = a^n b^n$ for all $n \geq 0$, $a, b \in G$, G an Abelian group.

MTH 411-1 Abstract Algebra II S17 Review for the Final Exam/Solutions 1. Let G be a group and N a normal subgroup of G with $G/N \cong \text{Sym}(4)$. Show that there exists HVG with $G/H \cong \text{Sym}(3)$. (Hint: Use Example 1.9.15 and the Third Isomorphism Theorem) By Example 1.9.15, $\text{Sym}(4)$ has normal subgroup E with $\text{Sym}(4)/E \cong \text{Sym}(3)$. Since $G/N \cong \text{Sym}(4)$, also G/N has normal subgroup F with $G/N/F \cong \text{Sym}(3)$.

MTH 411-1 Abstract Algebra II S17 Review for the Final ...

Solution a) As a set $S_3 = \{1; (12); (23); (13); (123); (132)\}$; by the Lagrange theorem the subgroups of S_3 should have orders of 1; 2; 3; 6: But the order of any cycle is equal with its length (for example, the order of (12) is 2). The only subgroup of S_3 with order 1 is $\{1\}$; the subgroups of S_3 .

MATH 251: ABSTRACT ALGEBRA I FINAL EXAM

SOLUTIONS Thus $2(a + b + c + 2 + d + 3) = a + b(1 + 2 + 3) + c + 3 + d + 2$. $= (a + 3b) + b + (d + 2) + (c + 2)$

: It follows that we can take $a = b = 0$ and $c = d$. In other words $2(2 + 3) = 2 + 3$. so that $Q(\) \text{fId}; 2g = Q(2 + 3)$. To be clear, a

solution to the problem is given by taking $2 = + 3$. 2. ABSTRACT ALGEBRA 2 SOLUTIONS TO THE PRACTICE EXAM AND HOMEWORK

MT310.01FinalExam Page4 Answers that $o(ab) = 6$. Let $c = ab$, and we know that G is a cyclic group generated by c , so $G = \{e, c, c^2, c^3, c^4, c^5\}$. Now the function $\phi: G \rightarrow \mathbb{Z}/6\mathbb{Z}$ given by $\phi(c^n) = [n]_6$ is an isomorphism. 10. (10 points) Suppose that G is a nonabelian group with 6 elements. Show that G is isomorphic to S_3 . Answer: By Cauchy's Theorem, G contains an element with $o(a) = 2$ and an element b
