Construction Technology for High Rise Buildings: Handbook ...

High-rise structures begin at the lowest range with the rigid frame in both steel and concrete. Some or all of the joints between the beams and columns are rigidly joined together by welding the steel or pouring the concrete in situ, and lateral resistance is provided by the rigid joints; this system can rise about 90 metres (300 feet) with little premium.

faster, safer and to a higher quality.

Mace unveils 'next generation' construction method
Construction technology is still a heavily fragmented, point-solutions-driven market with ample opportunity for integration plays that create either new platforms or attractive component acquisition targets for growing incumbent platforms. This fragmentation is more evident when analyzing construction tech offerings across the project life cycle.
