Relationship

Flashcards | Quizlet

Answer Key
b. The relationship is
exponential: $V =$

$1000(1.06)^y$, where V
is the value and y is
the number of years.

Investigation 4

An exponential pattern of growth would mean that the number of beetles is MULTIPLIED by the same factor every

Read Book

Growing

week, in this case 3.

$c.b = 5 + 10m$. The

“ 5 ” represents the

original number of

beetles. The “ 10 ”

represents the rate at

which the number of

beetles is growing.

Growing Answers

In general, the equation $y=a(bx)$ represents the relationship in an exponential function; a and b are positive.

The y -intercept (or initial value) is a and the growth factor is b .

If b is greater than 1, the function is increasing and

Read Book
