The baler is attached to the rear of a tractor 14 by a three-point hitch 16. In use, the baler is hauled behind the tractor as the tractor proceeds between the rows of a tree stand, stopping to center the baler over each tree selected to be baled. The trees are then baled in their natural position, in situ, where they remain until cut or removed for replanting. The baler 10 includes a collar means for encircling a tree trunk.
